Prevent data leaks and oversharing | Microsoft Purview

Turn on Data Loss Prevention (DLP)

Data Loss Prevention (DLP) helps prevent accidental sharing of sensitive information by identifying and protecting confidential data across your organization.

DLP policies can automatically detect sensitive content like credit card numbers, social security numbers, and other confidential information in Copilot interactions, emails, documents, and Teams conversations.

Learn more about Data Loss Prevention

Tip for completing this recommendation
To complete this recommendation, the default DLP policy to protect data in Microsoft 365 Copilot interactions must be turned on. Turning it on will enforce the policy and show data in Security Dashboard for AI.

Benefits

- **Prevent data breaches.** Automatically detects and blocks sharing of sensitive information before it leaves your organization.
- **Compliance protection.** Helps meet regulatory requirements for data protection and privacy standards.
- **User education.** Provides policy tips and notifications to educate users about data handling best practices.

Steps at a glance

1. **Navigate to Data Loss Prevention.** In Microsoft Purview, go to Solutions → Data Loss Prevention.
2. **Create a new policy.** Select 'Create policy' and choose from templates or create a custom policy based on your needs.
3. **Configure policy settings.** Define what sensitive information to protect, where to apply the policy, and what actions to take when violations occur.

Microsoft 365 Organizational Data Service

Import organizational data for Microsoft 365 in one place, and update as needed, to make sure you enjoy the full benefits of your Microsoft 365 and Viva experiences.
Learn more about importing organizational data for Microsoft 365

Data prioritization

You don't have permission to change data prioritization. To make changes, you need to be a global admin.

Data prioritization determines which data source takes precedence when data conflicts arise.

Data from Microsoft Entra ID is prioritized.

Edit data prioritization

rganization-wide data access

ecide which Microsoft 365 and Viva applications will be able to store
d use imported data.

Edit data access

Select connection type

Select the connection type you want to use to connect your organization's data and Microsoft 365.

Note: Attributes uploaded here will supplement attributes you've uploaded to Microsoft Entra ID. If any attributes conflict, those in Microsoft Entra ID take precedence. Learn more about attributes in Microsoft Entra ID

API-based connector

Automatically sync organizational data between your HRIS provider and Microsoft 365 using a secure API connection.

Learn more about API-based connector

Start API-based setup

Azure blob storage connector

Set up Azure Blob Storage that syncs between your HRIS provider and Microsoft 365. This is the recommended connection type to securely transfer data from any HRIS provider.

Learn more about Blob storage connector

Start Blob Storage setup

SAP SuccessFactors connector

Securely sync data between SuccessFactors and Microsoft 365. This is the recommended connection type for SuccessFactors users.

Learn more about the SuccessFactors connector

Start SuccessFactors setup

Workday connector

Securely sync data between Workday and Microsoft 365. This is the recommended connection type for Workday users.

Learn more about the Workday connector

Start Workday setup

CSV import

Populate your organization's data in the provided CSV template and import the file directly from your device, or upload it to SharePoint and provide the file path here. You'll need to periodically import a new CSV file to keep your data fresh.

Learn more about the CSV import

Start CSV import

Select connection type

Select the connection type you want to use to connect your organization's data and Microsoft 365.

Note: Attributes uploaded here will supplement attributes you've uploaded to Microsoft Entra ID. If any attributes conflict, those in Microsoft Entra ID take precedence. Learn more about attributes in Microsoft Entra ID

What does this CSV contain?

Choose how you want to import your data. Updated data will merge with existing data. Data uploaded to Microsoft Entra ID won't be affected.

- (●) **Update current data**
  Use this when your CSV contains the latest information for users.

  Examples:
  - User profile updates
  - Department changes

- ( ) **Import historical data**
  Use this when your CSV contains data from previous reporting periods. Historical records are added for reporting in Insights (including Copilot Dashboard) without replacing existing historical data.

  Examples:
  - Monthly snapshots
  - Quarterly reports
  - Backfilling older data

Preparation and setup

Overview

Prepare your organizational data

Standard reserved and custom attributes

- Download and fill in the CSV template, or use your own file. To automatically map columns and skip manual mapping, use reserved attribute names with the "Microsoft_" prefix, such as Microsoft_PersonEmail.
- To keep data accurate across Microsoft 365 apps, upload a full employee dataset every week.
- Imported data merges with existing data

Learn more about mapping

Learn more about reserved attribute names

Download template

Review common issues and required attributes before uploading to avoid validation errors.

View common issues

View required attributes

DELETE THIS ROW AND COLUMN BEFORE UPLOAD	**Required fields** These fields must be present; they require non-blank values for each row.			Maintaining the right EffectiveDate helps make sure that insights use the correct data over time. If you: •Add a value with a historical EffectiveDate, you'll overwrite the previous record of that attribute. •Add a value with an EffectiveDate set for now or the future, you'll create a new record for that attribute. Attributes will use that new EffectiveDate until another record is uploaded. •Don't include this column, Viva Insights will use the import date as the EffectiveDate.	These
Header name	**PersonId**	**ManagerId**	**Organization**	**EffectiveDate**	**LevelDesignation**
Definition (delete this row!)	Unique identifier for the employee record. It can be an employee's primary SMTP address or email alias.	Unique identifier for the employee's manager. It can be the manager's primary SMTP address or email alias.	The internal organization that an employee belongs to. For more actionable insights, avoid using too few or too many unique Organizations.	Date that a given attribute value applies for the employee. The attribute applies until another record for the same attribute with a different EffectiveDate is specified. If no EffectiveDate is uploaded, the date of upload is used as default.	Level that represents an employee's experience, management level, or seniori within the organization. For m actionable insights, avoid us too few or too many unique LevelDesignation values.

✅ Workplace-focused event (May 27, Oslo – day before CloudWay gathering)

- Described by Ståle Hansen as:
  - Looking for speakers across Identity, Security, Endpoint, Copilot, Sentinel, Purview, AVD, etc.
  - Clearly framed as an **open speaker request**, not yet finalized Speaking and Commu...
- No confirmation that:
  - Sessions are finalized
  - Event is publicly published

✅ **Status: Speaker selection ongoing**, effectively still open.

Workplace Ninjas Norway 2026 CFS
I see this has not been posted yet, CloudWay this is may 27, day before CloudWay gathering.
We are looking for engaging speakers in the following tech tracks:
Identity and Access Management
Endpoint Management / Windows / AVD / W365
Security / Microsoft Defender XDR / Sentinel / Copilot for Security / Purview
While this event is concentrated to Workplace Management, we ask for the following topics:

Key Topics:
Marketing activities: Nikki reported on the email campaigns and the clickthrough rates, and planned to improve the low-performing ones and use social media platforms, especially LinkedIn. 1
Webinars: Ståle reminded the team to check the registration list and encourage their customers to join the webinars, which will inform about important news and new routines. 2
Year end and pipeline: Ståle urged the team to update their leads, projects and pipeline, and identify the high value targets, to prepare for the budget and the marketing activities for the next year. 3

Minutes from this weeks status meeting
Thank you everyone for a good meeting today, here are the minutes from the meeting
Key Topics:
Marketing activities: Nikki reported on the email campaigns and the clickthrough rates, and planned to improve the low-performing ones and use social media platforms, especially LinkedIn. 1
Webinars: Ståle reminded the team to check the registration list and encourage their customers to join the webinars, which will inform about important news and new routines. 2
Year end and pipeline: Ståle urged the team to update their leads, projects and pipeline, and identify the high value targets, to prepare for the budget and the marketing activities for the next year. 3
Fundraising success: Nikki announced that they have raised 500,000 for fund X, and asked the team to share the positive news and keep up the momentum, and to analyze the key success criteria that made people invest. 4
Sales pitch guidelines: Ståle informed the team about the new templates and the new guidelines for the sales pitch, and emphasized the importance of using them and not the old ones. 5
Action Items:
Marketing activities:
Analyze the click through rates of the email campaigns and adjust the tactics for the next wave. (Ståle) 1

Meeting
to recap the meeting we had
before the next meeting
but then have a new meeting because too much time has passed
before the meeting to report the status which we need to meet about

NIC26

Action Items:
Marketing activities:

- Analyze the click through rates of the email campaigns and adjust the tactics for the next wave. (Ståle) 1
- Check the registration list for the webinars and follow up with the customers to ensure their attendance. (All team members) 2

Sales pipeline:

- Update the pipeline with the current status of the leads and projects and identify the high value targets. (All team members) 3

Fundraising success:

- Share the positive news of fund X with the team and target potential investors with the key reasons to invest. (Nikki) 4

Meeting summary:

- Use the new templates for the offers and follow the sales pitch guidelines. (All team members) 5

see less

Loved the flow in the meeting. I got inspired and I have already done my activities, asked our colluegue if it could be done, which it can and I have updated our tasks in Planner 👍

Go to channel

anyone seen this before?

Maurice Daly Yesterday 9:03 PM
No, sorry I haven't anyhow.

Alexander Holmeset Yesterday 9:15 PM
Il ask if they can attach a local drive instead

Today

Alexander Holmeset 10:59 AM
They have attached a drive, so il run the backup and upgrade of the forest level tonight

👍 1

Alexander Holmeset 7:39 PM
Foreste functional level is at 2016 now 🙄
will continue with Exchange 2019 setup tomorrow

```
PS C:\Users\t1.alexander.holmese> repadmin.exe /showattr *.nibrt.ie "dc=nibrt,dc=ie" /atts:msDS-Behavior-Version

Repadmin: running command /showattr against full DC SRV-DC01.nibrt.ie
DN: DC=nibrt,DC=ie
    1> msDS-Behavior-Version: 7 = ( WIN2016 )

Repadmin: running command /showattr against full DC SRV-DC02.nibrt.ie
DN: DC=nibrt,DC=ie
    1> msDS-Behavior-Version: 7 = ( WIN2016 )

Repadmin: running command /showattr against full DC SRV-DC03.nibrt.ie
DN: DC=nibrt,DC=ie
    1> msDS-Behavior-Version: 7 = ( WIN2016 )
```

💔 1

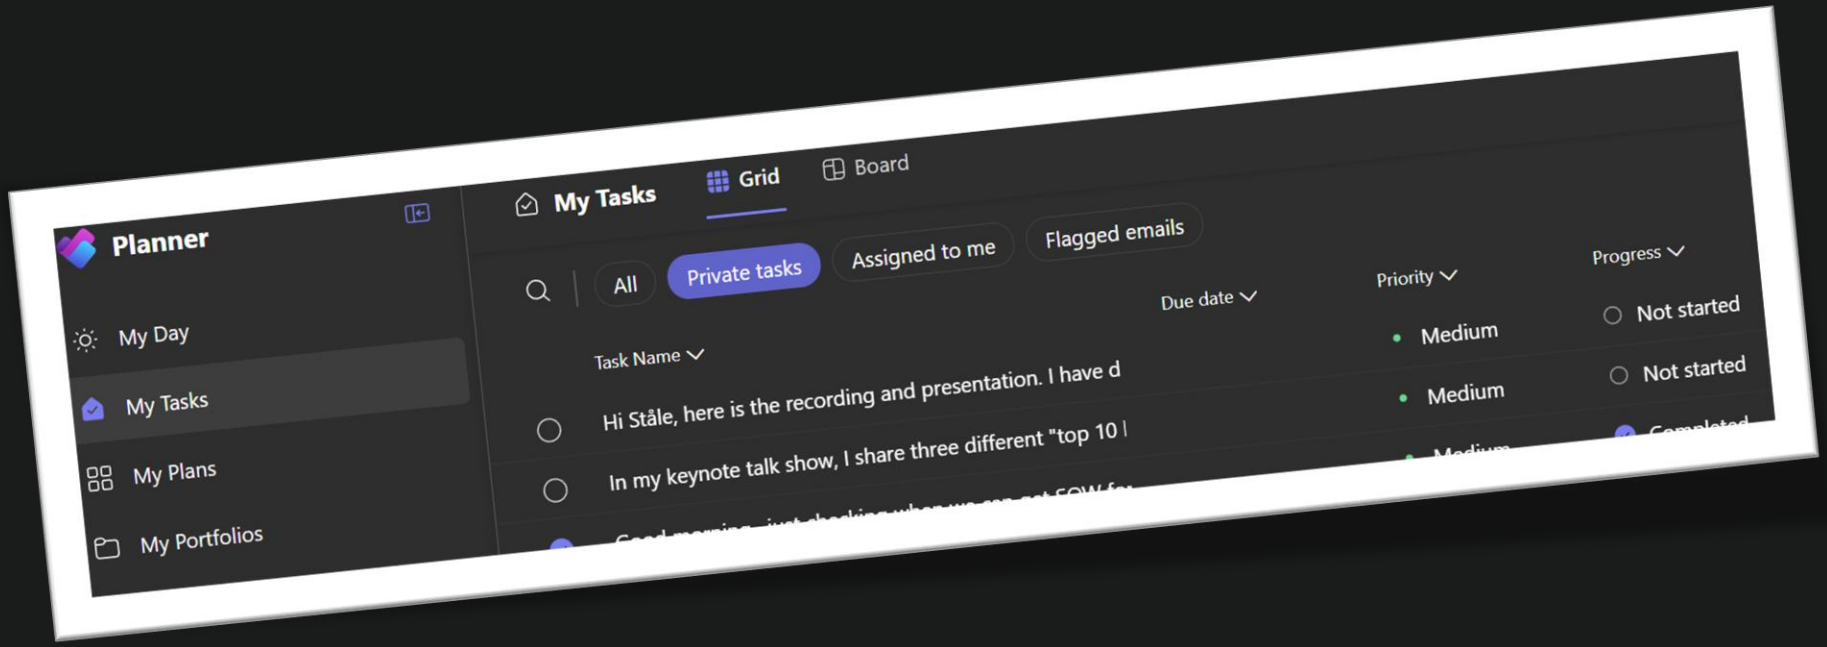

Alexander Holmeset 11:10 PM
not feeling sleepy, so have expanded the exchange schema

installing the exhcnage server 2019 now

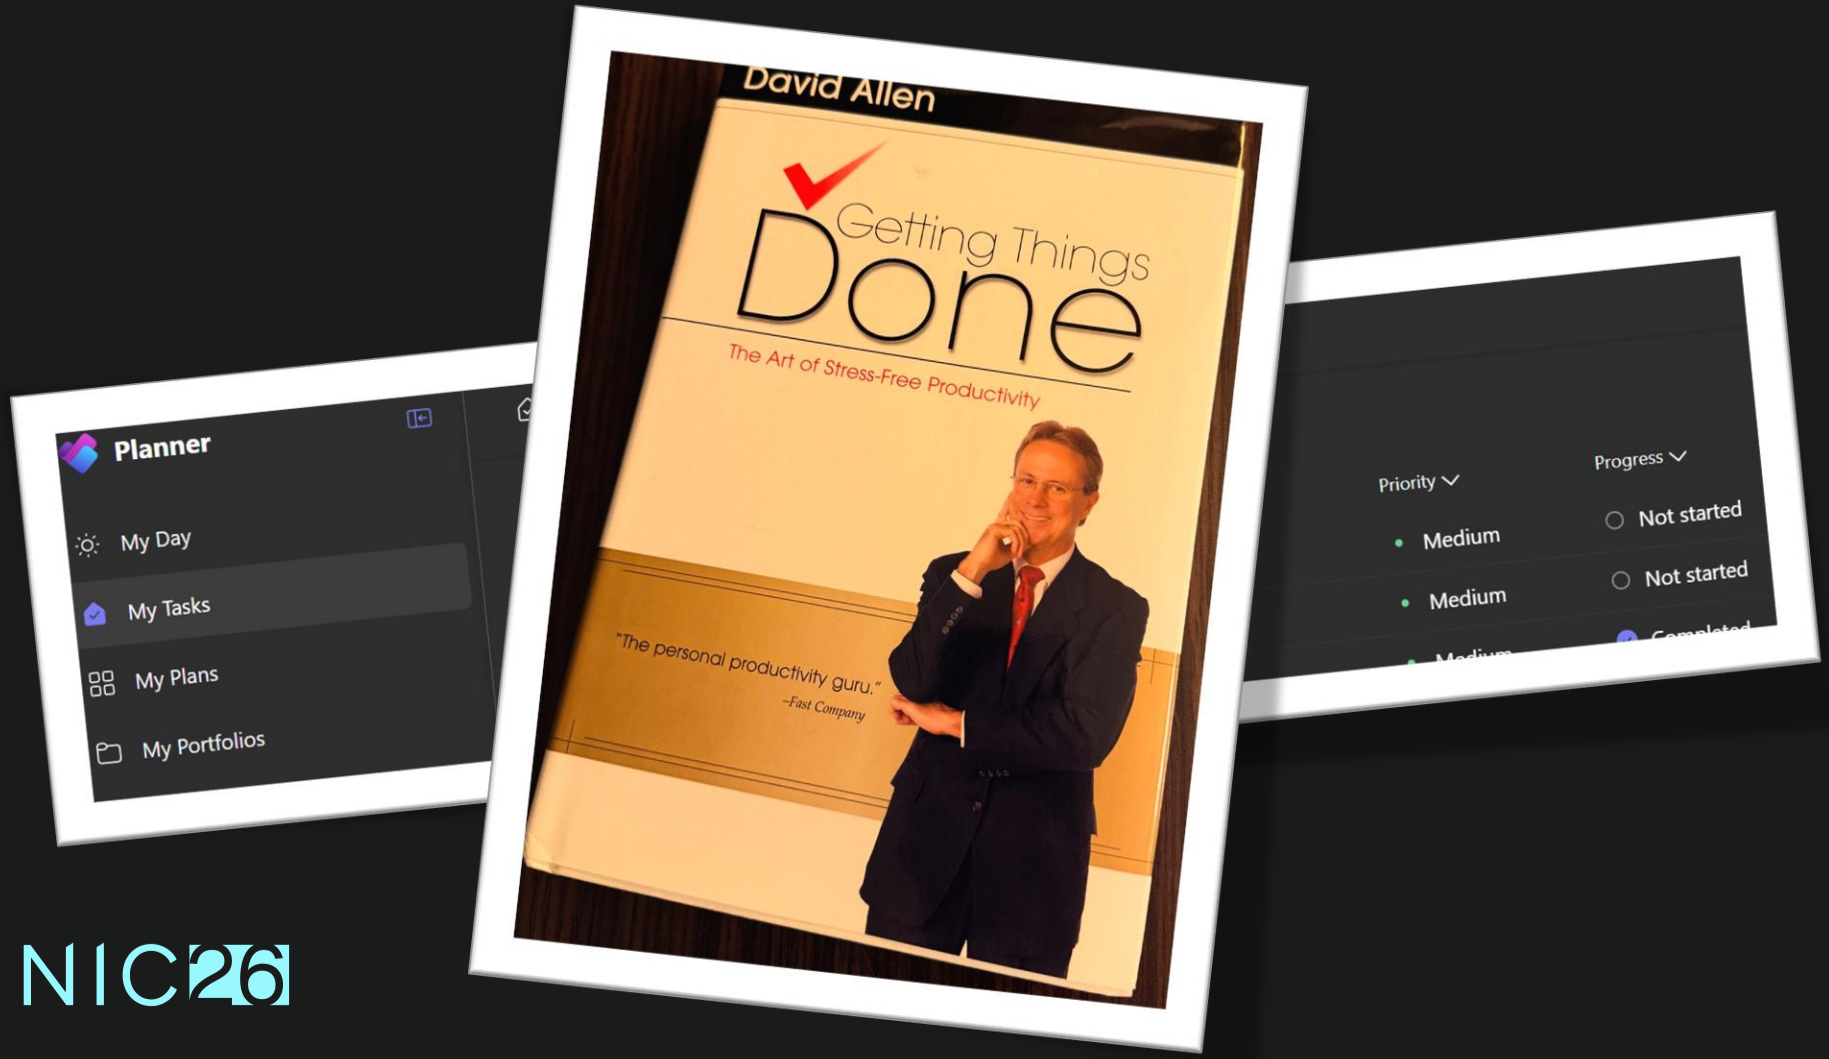

👍 1
